SOLUTIONS.**

1-800-444-4899

QUALITY RENTAL TOOLS & EQUIPMENT.

WELL SERVICED. PRICED RIGHT.

Large or small, Total Tool's Rental Department has the right tool for the job- from hand tools to generators to compressors and more! Our rental fleet is up-to-date, extensive, and backed by factory-trained service professionals. Whether the job is commercial, industrial or municipal Total Tool has the equipment you need to get the job done.

WHY RENT?

There are several reasons why equipment rental is the best choice for your business:

MAINTENANCE

Equipment rented on a day-to-day basis includes full maintenance relieving you of the need for repair shops, mechanics, spare parts inventory and maintenance records.

→ BREAKDOWN

Rental allows you to avoid the time and money lost due to breakdowns. At Total Tool, if rented equipment breaks down, we'll replace it for you at no cost.

→ WAREHOUSING

Warehouse facilities are seldom needed for rental equipment making it possible for contractors to operate with less overhead.

→ MOBILITY

Availability and convenience have become strong arguments for rental. Bidding on jobs several hundred miles away based on renting equipment near the jobsite is ideal for contractors.

→ COST CONTROL

Better cost control is possible with rented equipment. Knowing the true cost of owned equipment is difficult. Rented equipment offers one accountable cost figure - that shown on the rental invoice.

DISPOSAL COSTS

Preparing for the resale, advertising and selling of obsolete equipment are non-factors when you rent.

→ OBSOLESCENCE

Equipment rental businesses provide the latest types and models of equipment, thus eliminating obsolescence.

→ MINIMUM EQUIPMENT FOR THE JOB

Equipment ownership can be expensive especially when the equipment is idle. This problem can be minimized when ownership of basic equipment is combined, as needed, with rental.

→ PERSONAL PROPERTY TAXES AND LICENSES

There are no personal property taxes or license costs for rented equipment.

→ CONSERVATION OF CAPITAL

Rental conserves and frees capital for other, potentially more profitable uses.

→ INCREASES BORROWING CAPACITY

Since rental equipment does not appear as a liability on a balance sheet, the normal bank credit is not disturbed. This can be important in securing construction bonds.

→ RENTAL PACKAGES

Need more than one tool or machine? We're happy to customize a multi-unit rental package for your job. Whether its plant shutdowns, turnaround or short term jobs, this may be a perfect option.

RENTAL POLICY

CARE OF EQUIPMENT

Total Tool rents equipment with the understanding that some normal wear and tear will take place and this consideration is included in the basic rental rates. Renter is responsible for theft, vandalism, flat tires, negligence, abuse, misuse, routine maintenance, fuel and cleaning charges necessary to return the equipment in the same condition as when originally rented.

DEPOSITS

Unless pre-approved credit has been established, rental deposits and proper ID are required for each item rented.

MINIMUM

Minimum rental charge is one day.

RENTAL RATES

Construction equipment is available to rent by the day, week or month.

One day = 24 hours | One week = 5 consecutive days | One month = 28 consecutive days

Double or Triple Shifts Charges will be applied if equipment is used in excess of 8 hours a day, 40 hours a week or 160 hours per month. If longer than standard periods of time are needed, Total Tool will create an agreement to fit your needs.

You bet—our on-site delivery service has you covered. Give us a call and we'll get you what you need where you need it.

SO
IS RENTAL THE BEST
CHOICE FOR ME?

TOTAL  **TOOL**
SUPPLY, INC.

Let Total Tool's experienced staff work with you to help determine whether rental is a good option for your situation. We will take into consideration the following:

- What is the nature of your work?
- Will you have a consistent need for this equipment?
- Will the equipment stand the test of time?
- What is your tolerance for risk?
- What are your long-term needs?
